

To Whom It May Concern.

I wish to pledge our support of XM Satellite radio service. We pay for this service and we don't appreciate the mighty National Association of Broadcasters trying to dictate what we may or may not listen to. As it is, they don't seem to be able to control the context of the services they watch over now! Too much sex and violence during prime time is a major problem as far as we are concerned. Please do not let them be allowed to start controlling what is not under their jurisdiction.

The broadcast of weather and traffic conditions is a basic requirement of any other radio and TV station. Why should they be prevented from providing this service.

We thank you for not allowing them trying to stop this valuable service!

Tedd and Sandi Rodenbeck
